DETAILED ACTION

Priority

1. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

2. An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification or in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

Information Disclosure Statement

3. A portion of the information disclosure statement filed 4/15/01 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because part of the IDS statement has been incorrectly filed. The applicant has sent in a copy of the list of references that was cited by the examiner, this is improper filing of the IDS, there is no place for the examiner to initial or sign, to indicate that the reference has been considered. The remaining references have been considered, as shown by the examiner. But the Examiner list of references cited in the parent case, has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with

the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

Claim Rejections - 35 USC § 101

Claim 1 is rejected under 35 U.S.C. 101 because the claimed invention is directed to nonstatutory subject matter.

The basis for this rejection is set forth in a two-prong test of:

- (1) whether the invention is within the technological arts; and
- (2) whether the invention produces a useful, concrete, and tangible result.

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the "progress of science and the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. For a process claim to pass muster, the recited process must somehow apply, involve, use or advance the technological arts.

In the present case, claim 1 only recites an abstract idea. The recited steps of merely obtaining a passenger identifier, obtaining baggage, obtaining destination address, and delivering baggage to the destination, does not apply, involve, use or advance the technological arts since all of the recited steps can be performed in the mind of the user or by use of a pen and paper. These steps only constitute an idea of how to ship passenger baggage.

Additionally, for a claimed invention to be statutory, the claimed must produce a useful, concrete, and tangible result. In the present case, the claimed invention produces a method for transporting passenger baggage (i.e., useful and tangible).

Although the recited process produces a useful, concrete, and tangible result, since the claimed invention, as a whole, is not within the technological arts as explained above, claim 1 is deemed to be directed to non-statutory subject matter.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Golf Bag Shipping (GBS)(www.golfbagshipping.com).
- 6. GBS discloses the use of a method of handling passenger baggage, such as golf clubs, for a traveler (See Home Page), the method comprises:
 - a. Obtaining a passenger identifier for a passenger (See Home page, zip code, and How The Process Works, Item 1),
 - b. Obtaining passenger baggage (See How The Process Works, Item 3),
 - c. Obtaining a destination address for delivery (See How The Process Works, Item

1).

 d. Delivering passenger baggage to destination address (See How the Process Works, Item 3). Application/Control Number: 10/824,732 Page 5

Art Unit: 3629

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure. Quackenbush et al. (6,512,964) and Manabe et al. (6,594,547) discloses the use of

baggage transport systems and Bravman et al. (5,866,888) discloses the use of a traveler and

luggage security system.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Jamisue A. Webb whose telephone number is (703) 308-8579.

The examiner can normally be reached on M-F (7:30 - 4:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, John Weiss can be reached on (703) 308-2702. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
